

NEW LENOX GIRL EIRE DELEGATE

Viva Leola Moody, 21, Erie, and Rosemary Ann Archibald, 20, New Lenox, have been selected as delegates from Illinois to the International Farm Youth Exchange program for 1951.

Miss Moody will spend the summer and early fall on farms in Denmark, while Miss Archibald will live with farm families in Ireland, according to the announcement from W. G. Kammlade, associate director of the Illinois Extension service.

Miss Rosemary Archibald

Both young ladies are students in home economics at the University of Illinois this year. They will leave from Washington, D. C., the middle of June with 48 other American young people to go to their respective foreign countries, and will return to this country about the middle of November.

The International Farm Youth Exchange project gives American farm young people a chance to live and work on farms in foreign countries, mostly European. In exchange, other farm young people from those countries visit the United States and learn at first-hand how farm families live in this country.

Illinois has taken part in this program during two of the three years it has been in operation. Meta Marie Keller, LaSalle county in 1949, and Wendel B. Swanson, Winnebago county, last year, have been Illinois delegates.

Each delegate to a foreign country will live on assigned farms to which they have been invited in the countries where they are sent. They share in the daily work on the farm and in the social life of the family. When they return to the United States, they are expected to spend a considerable amount of time speaking before groups throughout the state and telling of their experiences.

'SADIE' TO AID EXPLORERS WITH PROGRAM

Mokena Explorer Scouts, Post 40 have assumed the job of buying and equipping a trailer to be used in case of a disaster in this area. This is a part of the general preparedness program initiated by the Rainbow Council of Boy Scouts in Will county. The money raised by the Post will be used for the purchase of this trailer.

Since plays are always enjoyed by our home folks, the boys decided to sponsor one. They have arranged with the Orland Park High school senior class to have them put on their class play in Mokena and share the proceeds with the Explorers.

The three act comedy "Sadie" will be presented in the Mokena school gym April 7 at 8 o'clock. This play concerns the antics of a girl who gets involved with a spy ring. There is a plot to blow up a local ammunition plant. In addition, Sadie is extremely frank in her speech, resulting in many hilarious situations.

The committee from Post 40 working on the project are Wilbur Rauch, general chairman; William Bradley Jr., assisted by W. Bradley Sr. with Lyman Teague in charge of ticket sales; Bruce Shoop, Russell Gauthier and L. Teague, Sr. in charge of the stage and Frederick Rauch and Cecil Ambuehl, handling publicity, with Milton Gauthier assisting.

The adults helping the boys are members of the Post Committee. Dance acts arranged by Mrs. J. Doyle will be featured between acts.—Frederick Rauch, publicity.

In attendance were Troop No. 61 from Manhattan, accompanied by their leaders, Mrs. Philip Goodwin and Miss Seltzer and Troops No. 97, 99, 100 and 140 from New Lenox.

Four girls from Troop No. 100 presented the colors, followed by everyone giving the salute to the flag and the Brownie promise. The girls sang their Brownie songs. A girl from each troop came forward to present the Juliette Low birthday pennies which were placed in decorated baskets at the foot of a giant rainbow. Each troop then sang a song. Folk dancing was enjoyed, the dances being demonstrated by the girls of Troop No. 97, accompanied by Mrs. Willard Sayers.

Refreshments were served from a buffet table, decorated in the St. Patrick's Day theme. Mrs. Carmel Eriksen and Mrs. Arthur Rowsell, leaders of troop 100, were on the refreshment committee, and Mrs. James Robertson was mistress of ceremonies. Mrs. Robert McCleary and Mrs. Glen Donaldson assisted with the folk dancing which was led by Mrs. O. V. Rowe. Mrs. Robertson's troop was assisted by Mrs. Frank Camerle and Mrs. Stanley Ekedahl. Those in charge of Troop 140 were Mrs. William Kirk and Mrs. Lou Henry.

The Coca Cola served at the party was donated by the Coca Cola bottling works and ice cream cups were donated by the New Lenox Lions club. This week the Girl Scout Troops are making Easter baskets to be distributed to the Salem Home for the Aged and several rest homes in Joliet.

CHECK TRIPS FLA. TRIPPERS

(CNS) A Joliet couple who planned a Florida trip with \$1,500 worth of checks from a mailbag stolen from a church were given a jail sentence and probation Friday by Federal Judge Walter J. LaBuy, Ronald Wayne McDermott, 24 years old, 101 South Eastern avenue, was sentenced to two years, and Mrs. Dorothy Mae Kreiger, 19 years old, 1029 Charlesworth avenue, was granted three years probation.

Both entered guilty pleas to possessing and McDermott to stealing first class mail taken by McDermott Feb. 1 in a bag left at the First Presbyterian church, Joliet, as a relay for Carrier John Will. The 115 letters included \$1,500 in checks.

McDermott passed one for \$55 belonging to Bernard McGee, 216 First avenue, Joliet, and tried to cash another for \$306.75 issued to B. D. McAtee, 216 First avenue, at the Joliet Currency Exchange, when the manager recognized him. He notified police who arrested McDermott two days later.

Mrs. Kreiger, who is separated from her husband, admitted opening 50 of the letters in his room, and that she was to provide the checks payable to women. Both said they intended to use the \$306.75 to finance a Florida trip.

Assistant U. S. Attorney William C. Gallagher said McDermott was placed on three years probation last April in Des Moines, Ia., federal court on a similar charge.

"Just Been Thinkin' "

There is a beautiful story which every Christian calls his own, for it is the cornerstone on which his religion stands . . . it is the saga of the greatest Man Who ever lived, but it is also the infamous record of One Who sacrificed Himself for the sake of the unworthy, and met a tragic death on the cross of Calvary. With the date of His death once more upon us, I should like each of my readers to share with me this

THOUGHT FOR GOOD FRIDAY

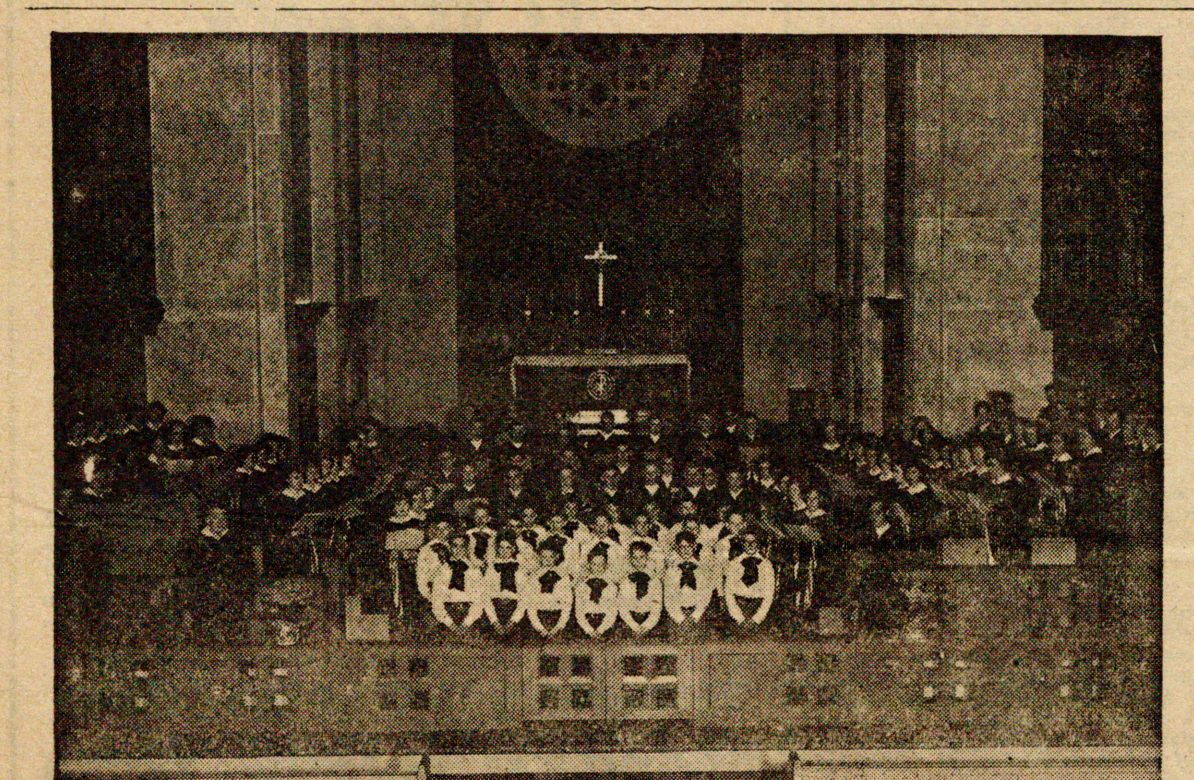

Is it nothing to you who hurry by,
A lonely cross in a windswept sky?
The emblem of sacrifice high in the blue
Calling you home—is it nothing to you?
Is it nothing to you who close your eyes
To the Savior's suffering as He dies;
And the little church with its empty pew
And room for one more—is it nothing to you?
Is it nothing to you, the debt you owe
For His crown of thorns, His blood-red flow?
That the taste of the gall you give Him anew
By passing Him by—is it nothing to you?
Is it nothing to you that only He
Can carry you over eternity's sea?
That He is redemption, total and true,
And your only hope—is it nothing to you?

Indecent Pictures

(CNS) Two men charged with
possessing indecent photographs
circulating in interstate commerce
were given probation for two years
by Federal Judge William J. Cam-
bell recently on condition they
help the government stamp out the
traffic by divulging their sources.

Robert E. Carson, 34 years old,
1951 East 74th Street, an account-
ant at Columbia Bedding company,
1750 North Wolcott Avenue, was
charged with selling 17 photos for
\$6 on April 24, 1950 and 42 more on
June 6, to a name he got from the
Globe Glamour Photo Studios,
Brooklyn. Assistant U. S. Attorney
Robert J. Downing said Carson
was arrested in 1949 with 90 others
taking photographs of models at the
Midland hotel, and again in
May, 1950, at the Commonwealth
hotel, 2757 Pine Grove avenue, at
meetings of a so-called Pam club.

The man who received his photos
Joseph F. Bertani, 26 years old,
220 Hamilton street, Lockport, an
employee of Reynolds Metal com-
pany, McCook, was charged also
with getting shipments from Mas-
sachusetts and California, through
Globe Glamour studios. Hundreds of
photos and sketches were recovered
from the two, which Judge
Campbell ordered destroyed.

"The government is primarily
interested in uncovering the source
of these pictures with the main
purpose of seeing they don't get
in the hands of school children and
servicemen," Judge Campbell told
Carson. "Apparently you were deal-
ing with adults and had only two
shipments, part of which were not
obscene. You tell the government
who belongs to this club, how of-
ten and where it meets, and what
interstate shipments are made."

Carson agreed, as Bertani had
already done. The cases had been
reached for trial on not guilty
pleas when the judge called law-
yers into the chambers for a pre-
trial conference and the changes
to guilty pleas resulted.

Committees on Appropriations, Ex-
ecutive, Industry and Labor Rela-
tions, Revenue, and Conservation.

King, the youngest Republican
ever to be elected to the Illinois
General Assembly, also becomes
one of the few first termers to be
appointed in recent years to the
powerful Appropriations and Ex-
ecutive Committees, both of which
have a great deal to do with the
policies followed by the House.

Prior to King's election, Speaker
Wood had been the youngest man
ever elected as a Republican to the
State Legislature and Wood now
becomes one of the youngest
Speakers ever elected in the his-
tory of the Illinois general as-
sembly.

Tuberculosis— An Economic Waste

In our fight against tuberculosis
we are thinking, first of all, of the
needless suffering and deaths
caused by this disease.

But there is another considera-
tion, too—the economic cost, which

points up the seriousness of the
tuberculosis problem in the United
States.

Tuberculosis in the United States
is estimated to cost more than
\$350,000,000 annually. Included in
this estimate is the cost to public
and private agencies for the care
of patients, case-finding activities,
public health nursing, rehabilita-
tion, treatment by private physi-
cians, hospital maintenance, aid to
families whose wage earners are
ill, medical research, and pensions
to tuberculosis veterans.

But the estimate does not in-
clude the cost of broken homes,
lost wages, and decreased produc-
tion, which are a part of the tre-
mendous toll exacted by tubercu-
losis. These costs run so high that
they defy attempts at estimation.

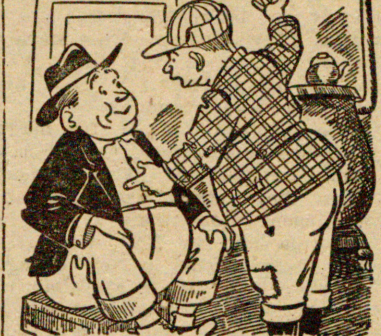

Although it can and does strike
at any age, tuberculosis kills more
young people between 19 and 35
than any other disease. People in
the most productive years of their
lives. It costs 1,500,000 potential
years of life and deprives the na-
tion of approximately 1,000,000
working years annually.

These losses mean needless waste
because tuberculosis can be pre-
vented and controlled. One of the
first steps in the control of the
disease is to find all persons with
tuberculosis and see that treat-
ment is provided for them. It is
estimated there are about 500,000
persons with tuberculosis in this
country, but only half of these are
known to health authorities. Many
of the others—a quarter of a mil-
lion people—do not even know they
are ill. For tuberculosis has no
obvious symptoms in its early
stage and may go unnoticed until
it has advanced.

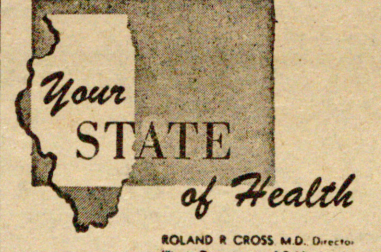

In the search for "unknown"
tuberculosis the principal weapon
is the chest x-ray. By means of a
chest x-ray tuberculosis can be de-
tected before its symptoms are
apparent.

"BLUE BABIES"

Water from many private wells
in Illinois contains large amounts
of nitrate, an element which can
cause a type of the "blue baby"
condition in infants. This condition
is similar in effect to blueness
caused by congenital heart disease.

Nitrate is most commonly found
in water from shallow wells of the
type which supply many Illinois
farms. There is no practical way
to remove nitrate from the water.
Wells dug in the same vicinity
usually contain similar amounts of
the dangerous element.

Families that get their drinking
water from a private well should,
therefore, have the water tested
before the arrival of a new baby.
If nitrate is present in concentra-
tion of 10 or more parts per million,
the water must not be used in the
infant's formula or for its drinking
purposes.

Nitrate tests are made free of
charge by the state Department of
Public Health. Concentration of
nitrate varies with seasonal
changes, so periodic tests are ad-
visable.

If a test indicates that the water
has a high nitrate content, the
family should inform its physician
immediately. He will explain pre-
cautions to be taken in feeding
the baby.

Disease Like Suffocation

This "blue baby" condition has
an effect similar to suffocation. It
occurs because the hemoglobin in
the blood which carries oxygen
from the lungs to body tissue is
unable to release oxygen to the
tissue. While the baby does not
appear to be suffocating, the body
tissue is actually "starving" for
oxygen.

First traces of blueness usually
appear around the infant's lips,
spreading to his fingers, toes and
face. In advanced cases his entire
body becomes slate-blue. Damage
to brain tissue may be one of the
serious results of the disease. It
can result in death.

Changing to water from an ap-
proved city supply will clear up
mild cases of this disease. In severe
instances it may be necessary for
the physician to give more active
treatment.

Not Dangerous To Adults

There is no evidence that nitrate,
high water will harm adults or
children older than four to six
months. However, research in this
field is relatively new.

The "blue baby" condition is not
a reportable disease, so the health
department has no accurate record
of the number of cases caused by
drinking water. Voluntary reports
of 33 cases which resulted in five
deaths in Illinois have reached the
department since this disease was
first recognized in 1945.

THE LOW DOWN FROM HICKORY GROVE

Quite a few States are coming out of their lethargy as concerns where do we get off if we do not soon, up and lower the boom, on the giant vehicles 2 and 3 sections long, that are pounding our roads to dust. "Lethargy," my word, says Henry. Sure, I say—but quiet—and if you have no dictionary, I will loan you mine.

I will proceed. I been reading where California has just discovered that its big trucks hit it up to 70 and that they out-run by 15 minutes, the fastest R.R. streamliner between San Francisco and Los Angeles—445 miles. The State has just "discovered" this flagrant speed.

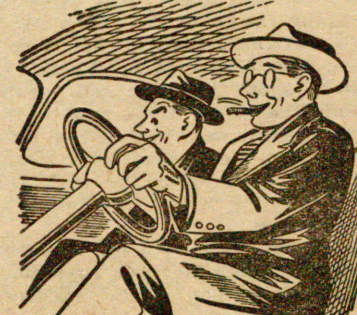

I deduct as follows, to-wit: via 3 answers. One: Let every citizen sell his flivver—stay home. Two: Build passenger car size gopher holes every half mile, so when a 70 mile per hour double-jointed, mile-high truck heaves into view, Mr. and Mrs. Ordinary Citizen could dive for safety. Three: And, no joking, require that the heavy freight people provide their own road-bed join in with the railroads, buy half the R.R. right of way and pave such, if they choose to get them self their own private and independent roadway.

And in conclusion—after we get our pavements back—get ourself a new law where any passenger car builder who builds a car that will go faster than 50 miles per hour, would be hanged at daybreak, or even sooner.

Yours with the low down,
JO SERRA

MODERN METHODS IN HAYMAKING

CALL FOR
The Bale-O-Matic

The new Bale-O-Matic picks up the hay, slices and ties into firm 40 inch bales of a density and weight pre-selected by the tractor operator—the only manpower required. Bales are tied with two strands of steel wire while under compression and are counted as delivered from the rear of the machine.

Outstanding Features: Bale chamber, plunger and packer head and arms are all of steel welded construction. Knife steel shear blade assures easy separation of uniform layers of hay. Hardened cut steel plunger and counter shaft drive gears run in enclosed oil bath. Roller chain driven drive shafts turn on roller bearings or bronze bushings and are equipped with safety spring release clutches. The light draft Bale-O-Matic is mounted on pneumatic wheels and is powered by a 4 cylinder "V" type air cooled engine.

For complete information on the many outstanding features of the Bale-O-Matic and other Modern MM Machines and Tractors, see your MM Dealer. MM Modern Machine Tools for your farm factory means extra profits for you. MODERN MM MACHINERY IS WORTH WAITING FOR—BUT GET FACTS NOW.

Public Service Co.
Asks for Gas Two-Way Rate Change

The Public Service Company of Northern Illinois has just petitioned the Illinois Commerce Commission for a two-way adjustment in its gas rates which, if approved, would increase costs for 116 large industrial customers by approximately \$900,000 a year and reduce costs by a corresponding amount for 380,000 residential and small commercial gas users.

The proposed rate changes will have virtually no effect on the company's total gas revenues. It was said.

The industrial users whose gas rates would go up are mostly those who buy large amounts of gas under interruptible or off-peak rates which have been unchanged since 1932 and which are unreasonably low. The gas is mainly for processing industrial products or for boiler fuel and is purchased on a "when available" basis when demands of regular gas customers are low.

The rates for these industrial customers will be increased three-tenths of a cent and five-tenths of a cent a therm for the two classes of interruptible processing customers and five-tenths of a cent a therm for interruptible boiler fuel customers. Rates for most off-peak industrial users who get gas only during warm months are also to be raised slightly. Due to rising costs, the low industrial rates no longer carry a fair share of the total costs of providing gas service, the company said. The utility estimates the total increase in the industrial rates at \$912,000 a year based on 1950 use by these customers.

The higher costs of gas to the large industrial users will be offset in part by additional amounts of gas expected to be made available to them when the new pipeline now being built from Texas is completed. Larger amounts of gas made available next year will result in a reduction of over-all fuel costs for many of these industries, he company said. According to the petition certain of the present interruptible rates will continue to be available to the industrial users until October 1.

The additional revenue of \$912,000 a year from the increased industrial rates will be passed on to 380,000 residential and small commercial gas users in the form of an estimated \$918,000 a year rate reduction. Rates for general residential customers (cooking) will be decreased by an average of 14%. Residential water heating rates will go down an average of 3% while residential space heating and commercial users will get slight reductions.

The new lower residential gas rates proposed are:

General Residential:
First 10 therms 18c
Next 30 therms 11c
All over 40 therms 10c

Residential Water Heating:
First 10 therms 18c
Next 30 therms 11c
All over 40 therms 7.5c

Residential Space Heating:
First 10 therms 18c
Next 30 therms 11c
Next 50 therms 7.5c
All over 90 therms 7c

Your Plow Dollar Buys MORE VALUE... in JOHN DEERE TRUSS-FRAME PLOWS

There are four mighty important reasons why a John Deere Truss-Frame Plow is your best buy.

1. John Deere Truss-Frame Plows are in a class by themselves for toughness... for shock-absorbing strength. Frame members and bottom standards are held in rigid alignment; shocks of hard work are absorbed by the whole frame.
2. There's plenty of clearance for fast, deep plowing... for excellent work in trashy field conditions.
3. Servicing is simple and economical.
4. Genuine John Deere bottoms add the important advantages of clean scouring, light draft and good pulverizing, making the John Deere your best plow investment. See us for complete details.

FORD WINS AGAIN!

V-8 TAKES FIRST PLACE IN CLASS "A" 1951 MOBILGAS ECONOMY RUN

Both Ford V-8 and SIX Deliver more than 25.9 miles per gallon

Gruelling 840-mile test proves Ford Economy

Again this year... it's high honors for Ford! In the most important economy trial for American stock model cars... the famous annual Mobilgas Economy Run... A Ford 100-h.p. V-8 equipped with Overdrive took first place competing against all cars in its price class, making 54.587 ton-miles per gallon* and 25.994 miles per gallon. And its companion in quality, the new Ford SIX with Overdrive, was right up there with the winner. In fact, both cars averaged better than 25.9 miles per gallon.

Traditional Ford economy, for the second straight year, has been proved in open competition. Proved on the tough 840-mile grind from Los Angeles to the Grand Canyon... a course that included city traffic, below-sea-level desert heat and 7,000-foot mountain passes. Ford's Automatic Mileage Maker, standard equipment on all Ford V-8's and SIXES, contributed to this great achievement by squeezing the last mile out of every drop of gasoline.

Why not "Test Drive" the new Ford at your neighborhood Ford Dealer's? There's no better way to be convinced that "You can pay more but you can't buy better!"

*The AAA Contest Board determines the winner by a "ton-mile per gallon" formula to insure equal chance for all cars in each class regardless of size and weight. Ton-miles per gallon equals the car weight (including passengers) in tons, multiplied by number of miles travelled, divided by number of gallons of gasoline consumed.

PUBLIC NOTICE
Notice of Proposed Change in Gas Schedules
Public Service Company of Northern Illinois hereby gives notice to the public that it has filed with the Illinois Commerce Commission on March 15, 1951, a new schedule of rates for gas service, Schedule G-7.

On December 15, 1950, Western United Gas and Electric Company and Illinois Northern Utilities Company were merged into Public Service Company of Northern Illinois. The four schedules for gas service as in effect prior to the merger were continued in effect after the merger as schedules of Public Service. The proposed new schedule will replace these existing schedules so that only one schedule and uniform rates will apply to the entire territory now served by Public Service. It is estimated on the basis of use during 1950, that the proposed uniform rates will not result in an increase in the Company's revenue. In general reduced charges are provided for residential, commercial and firm industrial service, and increased charges are provided under the interruptible rates and to certain large industrial users under the off-peak rate. The present rates for interruptible gas service expire on May 1, 1951 and the availability of this service is extended until May 1, 1952, under the increased rates contained in this filing.

Further information with respect thereto may be obtained either directly from this Company or by addressing the Secretary of the Illinois Commerce Commission at Springfield, Illinois.

A copy of the proposed change in the schedules may be inspected by any interested party at any business office of this Company.
